

Position Description

WATER RESOURCES STAFF SCIENTIST

Location

Montpelier, Vermont.

Position Summary

Stone Environmental, Inc. is seeking a talented, detail-oriented individual with a background in the physical sciences for a full-time, permanent staff-level position in our Water Resources Management service. The successful applicant will support a group of engaged professionals working on a rich variety of projects including stormwater and phosphorus management plans, local and state-wide stormwater policy, and wastewater feasibility studies for unsewered communities.

Responsibilities

The person performing this job will be responsible for coordinating and conducting field data collection activities; developing and maintaining stormwater retrofit opportunity datasets; processing, interpreting, and presenting water quality, hydrologic, land cover/land use, and stormwater management data; completing literature reviews and condensing findings; and preparing high quality technical memoranda and reports.

Required Skills

The following skills are required to be considered for this position:

- Strong organizational skills
- Strong writing skills
- Geographic Information System (GIS) and data management skills
- Critical thinking and problem solving
- Self-motivation and keen attention to detail
- Ability to work as part of a team

Preferred Skills

- Experience with stormwater retrofits on existing sites.
- Strong interest in Vermont's clean water initiatives, including experience with stormwater management regulations.

Education

Master's degree or higher in the physical sciences (e.g., agricultural/biological engineering, civil/environmental engineering, hydrology, geology, atmospheric science, chemistry, or related environmental science discipline). One to two years of post-graduate experience in a consulting or scientific position in a relevant field is required.

How to Apply

Please visit our company website at www.stone-env.com to apply online.
