

Environmental Assessment, Cleanup and Development Services

Stone Environmental is a Vermont-based company with a reputation for providing high-quality environmental consulting services. Our team began in Vermont in 1992 and has grown to include geologists, soil and groundwater specialists, and environmental engineers with experience in the investigation and cleanup of hazardous sites. Our project teams regularly include experts in public outreach, urban planning and design, landscape architecture, hazardous materials assessment, and cultural resources. We have the tools and the experience to bring world-class solutions to communities faced with the challenges of environmental assessment, cleanup of contaminated properties, and Brownfields redevelopment.

Environmental Assessment, Cleanup, and Development Services

Our team of scientists and engineers are your trusted experts in the following areas:

- Brownfields Reuse and Environmental Liability Limitation Act (BRELLA), Environmental Liability Limitation Program managed by the VT Department of Environmental Conservation;
- Community outreach, including soliciting input on development plans and communicating complex technical topics to the general public;
- Brownfields Assessment and Cleanup Grant support;
- Perfluorinated Compound (PFC) sampling and investigation, including PFOA and PFOS – Stone has an approved PFC sampling plan with the VT Department of Environmental Conservation;
- Environmental Due Diligence, including Phase I and II Environmental Site Assessments;
- Investigation and remediation (cleanup) of contaminated properties;
- Vermont Petroleum Cleanup Fund (PCF) assessments and cleanup;
- Polychlorinated biphenyls (PCB) assessment and cleanup in accordance with State and Federal regulations; and
- National Environmental Policy Act (NEPA) Environmental Reviews in support of funding applications to FEMA, and to the Vermont Community Development Program administered through the Vermont Agency of Commerce & Community Development.
